Attachments: Draft Rationale for LandslideProne Areas 10-02-14 ah_ac.docx

Sorry about that Alan. Here's a combined version.

Don, I'll send a clean version to you and Lynda in just a minute.

Don and Allison,

Attached is the most recent draft of the Landslides Rationale. I did not have time to incorporate Steven's comments. I think many of his comments are very good, but some of his comments are moot because this version of the rationale no longer includes some of the narrative he commented on in the version he reviewed. I will be addressing Steven's comments on Friday.

Don, while this version is not perfect, I think it is still good enough for Linda to review. It certainly gives her a sense of the issues, concerns, our recommended action and the reasons for our recommended action.

Allison, if your preference is to send Linda a copy of your edited version of the attached rationale, with the "supplemental information", please let Don know before he sends this version to Linda. I will try to touch bases with both of you early tomorrow.

Alan
